#### **DETAILED ACTION**

#### **Priority**

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 11/29/2005 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "angularly oriented inductor coil" as claimed in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Application/Control Number:

10/558,549 Art Unit: 2834

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Soh (US 5,943,909).

### 4. As per independent claim 1:

A device for angular positioning of a starter on an interfacing support (11) with a thermal combustion engine of a vehicle [abstract and Fig 1], and comprising means for indexing constructed on a tubular cylindrical head (10) [Fig 2,7d and 8c] of an inductor coil [Fig 1,38] of the electrical engine [abstract and Fig 1], and the support (11) in such a way as to immobilize the inductor coil in rotation, and to angularly orient the inductor coil with relation to the support (11) [Fig 2, 7d and 8c],

characterized in that the indexing means comprises at least one axial projection (12) integral with the cylindrical head (10) [Fig 2,8 and 8c], and designed to be engaged in a

10/558,549 Art Unit: 2834

complementary slot (13) provided in the support (11) for creating an indexing area (14) without radial added thickness [Fig 2,7d and Col 7 II 3-12].

## 5. As per dependent claim 2:

The angular positioning device according to claim 1, characterized in that the angular orientation function is transferred to the interfacing support (11) having one or more slots (13) for receiving the axial projection [Fig 2,7d and Col 7 II 3-12].

## 6. As per dependent claim 3:

The angular positioning device according to claim 1, characterized in that the slot (13) is integrated in the circular contact (16) of the support (11) [Figs 2,7d and 3,7d].

## 7. As per dependent claim 4:

The angular positioning device according to claim 1, characterized in that the projection (12) is separated from the slot (13) by a clearance to create an outlet orifice (21) enabling water to be evacuated from the starter [Fig 4 and Col 7 II 3-27].

# 8. As per dependent claim 5:

The angular positioning device according to claim 4, characterized in that the water evacuation is performed through a baffle (20) [Fig 4 and Col 7 II 3-27].

# 9. As per dependent claim 6:

10/558,549 Art Unit: 2834

The angular positioning device according to claim 4, characterized in that the water evacuation is direct through the outlet orifice (21) [Fig 4 and Col 7 II 3-27].

#### Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for details.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naishadh N. Desai whose telephone number is (571) 270-3038. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571) 272-2204. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
